SUMMARY

I am a Seattle-based Web Developer proficient in HTML5, CSS3, Javascript, jQuery, TML5, CSS3, Javascript, jQuery, React, NodeJS, Ruby on Rails, PostgreSQL, MongoDB, Django, AJAX, RESTful APIs, and Web Scraping. I have a desire to grow and continuously learn to strengthen my passion for creating. The knowledge I have acquired thus far, gives me the ability to build responsive, full-stack web applications. Having a strong background in analytical science, I have a lot of experience with the cohesion of technology, data-analysis and troubleshooting with efficiency in a team-oriented environment.

This should show impact and aptitude. Show growth/volume/measurements/countable/

EDUCATION

Castleton University
BA Health Science 2013

EMPLOYMENT

General Assembly, *Full-Stack Web Developer*   Nov 2017 - Current
Worked for 50-60 hour weeks for in an intensive, collaborative learning environment.
Used white-boarding and Agile techniques during project sprint runs

Aspenti Health,
